

10) Functions

Set of instructions / code is already pre-defined is called functions.

These are 3 main components of functions

1. Function name.
2. Number of input
3. Return value.

* Lower Case.

The lower case function converts all letters in a text string into lowercase letters

Syntax : = LOWER (text)

Ex : = LOWER ('BHAVANI')

Bhavani

* Upper Case

The upper function converts all letters in a text string to upper letter

Syntax : = UPPER ('text')

Ex : = UPPER ('Raj')
RAJ

* Proper case

The proper function converts the first letter of each word to uppercase and the remaining letters to lowercase.

Syntax :- = PROPER (text)

Ex : = PROPER ('bhavani')
Bhavani

* Len

The len function counts the numbers of characters in text string, including spaces

Syntax : = LEN (text)

Ex : = LEN ("Data Science") = 12

* Left function

The left function extracts a specified numbers of characters from the beginning (left side) of a text string.

Syntax : = LEFT (text, num Char)

Ex : = LEFT ("Data Science", 4) = Data

* Right function

The right function extracts a specified numbers of char from the end (right side)

Syntax : = RIGHT (text, num-char)
Ex : = RIGHT ("Data Science", 7)
Science.

* MID function

The mid function extracts a specific number of char from the middle of text string, starting from a specific position
Syntax : = MID (text, start-num, num-char)
Ex : = MID ("Data Science", 6, 7) = Science.

* Text extraction using left and len [1st half]

The left + len combination is used to extract the first half of the char from a text string

Syntax : = LEFT (text, LEN (text)/2)
Ex : = LEFT (Bharamani, LEN (AI)/2) Name: Bharamani

* Second half char extraction

The right + len combination is used to extract the last half of a text string

Syntax : = RIGHT (text, LEN (text)/2)
Ex : = RIGHT (AI, LEN (AI)/2)
ani

* Round-up function

The roundup function rounds a number upward, away from zero to a specified number of digit

Date / /
Page

Syntax: = LEFT (text; ROUNDUP (LEN (text)/2, 0))

Ex: . If A1 contains BHAANI

=LEFT (A1, ROUNDUP (LEN (A1)/2, 0))

BHA
