

25/09/26

* Find

FIND is used to find the position of a specific char on text within another text. It is case-sensitive.

Syntax: =FIND("char", text)

Name = BHARANI

Ex: =FIND('a', A1) => 23

* Search

Search is used to find the position of one text within another text.

Syntax: =SEARCH('char', text)

Ex: =SEARCH('h', A1) => 2

* First name

To extract the first name from a full name

Syntax: =LEFT(A1, FIND(" ", A1)-1)

'B

* Last name

To extract last name

Syntax: =MID(char, FIND(" ", char)+1, len(char))

Ex: $= \text{MID}(A1, \text{FIND}(" ", A1) + 1, \text{LEN}(A1))$

* To combine all the char as single string
 Syntax: $= \text{CONCAT}(\text{char}, " ", \text{char}, " ", \text{char})$

Ex: hi Bhavani gm
 $= \text{CONCAT}(A12, " ", G12, " ", H12)$
 hiBhavani gm

* Substitute

Replace specific text with another text
 Syntax: $= \text{SUBSTITUTE}(\text{char}, "a", "@")$
 Ex: $= \text{SUBSTITUTE}(A1, "a", "@")$
 Bh@v@ni

* Replace

Replace characters in a text based on their position and number of character
 Syntax: $= \text{REPLACE}(\text{text}, \text{start_num}, \text{num_char}, \text{new_text})$

Ex: $= \text{REPLACE}("ABCDEFGH", 3, 2, "xy")$
 ABBDEFGH
